

## Precision

Dr. Gilbert Tremblay, B.Sc., DMD  
Montreal, Canada

Virtual prosthetic components that are 3D replicate of the final restoration. One can increase the precision of implant location relative to the prosthetic plan.

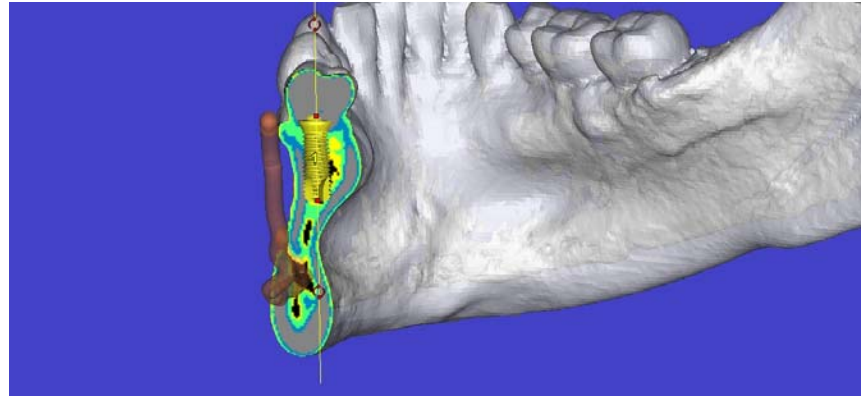

## Predictable

Dr. Gilbert Tremblay, B.Sc., DMD  
Montreal, Canada

- Predict your bone graft volume before surgery and reduce the operatory time. Present a 3D image of the bone defect to your patient.

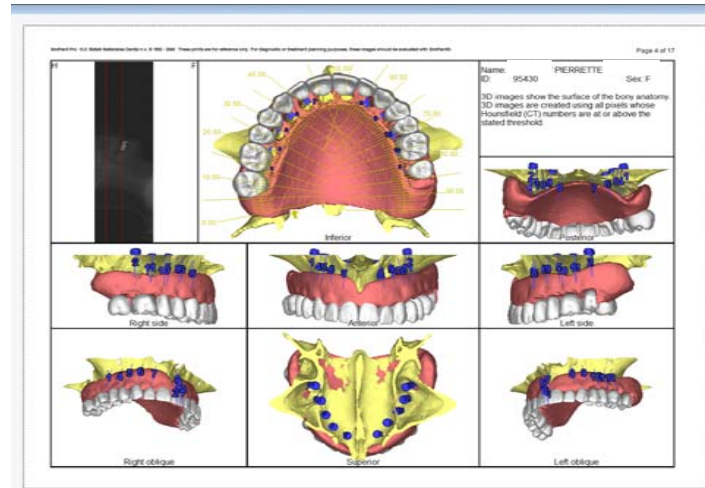

## Predictable

Dr. Gilbert Tremblay, B.Sc., DMD  
Montreal, Canada

- Increase the patient's safety by pre-operatory precise planning and predictable execution of the treatment.

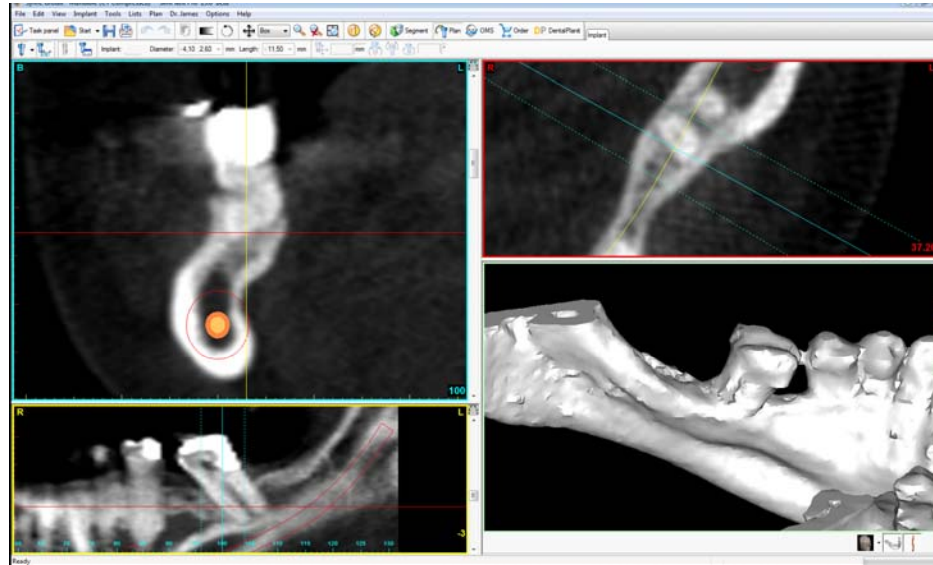

## Case acceptance

Dr. Gilbert Tremblay, B.Sc., DMD  
Montreal, Canada

- Provide your patient with a take home copy of the treatment plan. So he/she can present the plan to another party and facilitate his or her decision.

# Periodontal condition

Dr. Gilbert Tremblay, B.Sc., DMD  
Montreal, Canada

- Become more efficient in your treatment predictions working with 3 dimensional parameters of bone loss.
